Abstract of **EP 0883269 (A1)**

A telecommunication transmitter (TU) for a multi-carrier transmission system of the Digital Subscriber Line ADSL type and which includes a coding circuit (MMC) able to generate "symbols" derived from carriers (C1-Cn) modulated by incoming data, and a line driver circuit (LDC) to amplify these symbols. When idle data are received, the power dissipated in the transmitter is reduced because the symbols are then merely derived from a few or even a single carrier (the "pilot tone") instead as from all the available carriers. The power dissipated is even more reduced because the line driver circuit comprises the parallel connection of a high voltage but low efficiency (LL) and a lower voltage but higher performant (LH) line amplifier. The higher performant, and thus less power consuming, amplifier (LH) is used when idle data are received at the input (IN).; In a variant, there is only one line amplifier of which the quiescent current is controlled in function of the data traffic. In another variant, the number of carriers used by the coding circuit (MMC) is a function of the mean traffic of effective data received.

Abstract of **WO 2004082230 (A1)**

The present invention relates to methods, computer program products, a transmitter, a receiver and a transceiver comprising said transmitter and said receiver in a digital communication system for reducing the transmit power level when there is no user data is to send, i.e. when dummy data is sent instead. That is achieved by defining a symbol alphabet Q and scrambling a bit stream comprising user data and dummy data with randomly generated symbols from the symbol alphabet Q.

Data supplied from the **esp@cenet** database — Worldwide

11-20 of 39 hits for **scrambling data "symbol alphabet" "power level"**

Application Number Information

Application Number: **10/549449**

Assignments

Filing or 371(c) Date: **07/19/2006** eDan

Effective Date: **09/14/2005**

Application Received: **09/14/2005**

Pat. Num./Pub. Num.: **/20060262873**

Issue Date: **00/00/0000**

Date of Abandonment: **00/00/0000**

Attorney Docket Number: **1505-1028-1**

Status: **30 /DOCKETED NEW CASE - READY FOR EXAMINATION**

Confirmation Number: **5502**

Title of Invention: **ARRANGEMENTS AND METHODS FOR A DIGITAL COMMUNICATION SYSTEM**

Examiner Number: **80488 / TORRES, JUAN**

Group Art Unit: **2611**

IFW Madras
